

Westminster Presbyterian Church Cares!

We are a mission Church, and have adopted another mission to strive to conquer, But we need your help!

We will be helping to save starving children through:

Plumpy'nut[®] is a ready-to-use therapeutic food, endorsed by the World Health Organization and UNICEF, and is proven to treat severe acute malnutrition with astounding success rates. It is an energy-dense paste made with peanuts, milk powder, sugar, vegetable oils, and a fortified vitamin and mineral mixture.

Plumpy'nut[®] is revolutionary because it does not need to be refrigerated or mixed with water – two things not readily available in the developing world. It allows for malnutrition to be treated at home by the caregiver instead of in a costly hospital stay and saves lives as if it were an essential medicine. In 4-6 weeks, a child can be transformed from near death to certain survival. With its 2-year shelf life, this simple solution can reach even the most remote areas. In times of great natural and human disasters, ready-to-use foods can effectively and efficiently fulfill caloric and micronutrient needs to the most vulnerable. In recent times, they have helped fill emergency needs in earthquake-ravaged Haiti, drought-stricken Niger and flood-affected Pakistan.

For more information on Plumpy'nut[®] please contact your local

Church World Service Representative.
